COMMON and UNUSUAL

Although URBAN & SUBURBAN provide all the basic necessities, it also goes the extra mile by offering more isolated settings and recordings of events that help when a change of scene or dramaturgy is needed. Different kinds of traffic, people groups and animals, structures, wind, and a myriad of other sounds are featured in this library. This will ensure you can create an immersive experience with all the required elements.

WHAT We recorded

Our research aimed to document the most commonly used public spaces that a city and its surroundings can offer, including train stations, airports, housing sites, construction sites, and many more.

To allow for maximal flexibility, we made the recordings in a way that they could be used for similar places with variations while also separating the sounds that stood out to provide more precise tuning.
