Mega Icons Bundle This occurs only rarely, and in the event that "an icon designer" wraps all of his icon sets and makes them available in the form of a **beautiful set of icons** for sale at a **ridiculously low cost**. This Mega Icons Bundle consists of five icon sets that provide 4220 icons...

Flatilicious

Flatilicious is a massive icon-set comprising 1000 flat icons that encompass various symbols that are divided into 28 different categories. The icons are designed to appear clean at smaller sizes and with an eye for consistency. It's among the most popular icons with a flat style on the web. In addition, it's my top-selling item so far.

The Icons

What's better than having an entire collection of universally-designed icons that you can apply in every project? "The Icons" are specifically made to appear symbolic at tiny sizes. They provide designers and developers icons that can be utilized over and over again in a variety of app designs and web design as well as branding tools. One icon pack can dominate all others.

Mega Icons Bundle The Ultimate Pack

They're basically 2 icon sets that are wrapped up in one. 600 Stroke icons plus 600 Solid icons. That means you'll get 1200 icons. They're carefully created on a grid of 16x16 pixels and share a similar visual language. Inside, you'll find commonly utilized pictograms, as well as icons for business, eCommerce electronic devices, weather, emoticons, and many more.

Responsive Icons

Does the name ring to you? The icons were created with a passion to explore how the same concept could be implemented on a 16x16px 32x32px, 64x64px, and 32x32px grids. The icons can be made to adjust their size according to the resolution of the screen, meaning that the larger size can be used to display large resolutions as well as the medium size for tablet-like resolutions, and the smaller size that is -- you've guessed it is for mobile devices. It's still a good set of over 900 images you can use them in any way you'd like.

You will receive Seamless Icons Designs for free, but they are sold as a separate item.

Simple Sitemap Cards

A must-have item in the web design toolbox process. It's intended to substitute and add appeal to boring sitemaps. The set includes 120 cards that will dramatically accelerate the sketching sitemap and assist you to enhance the flow of the user to your client in an engaging and innovative method.

Each card is created as a mixture of vector shapes. As such, the customization of dimensions, shapes, and colors is easy. Simply open one of the vector files included. You can use them for icons, too, because they're based on an underlying grid of 64x64pxicons is something that designers would be able to agree on.
