Blender Market - Dynamic Terrain v1.0.3:

Dynamic Terrain is a Blender add-on designed to ease and enhance terrain modeling and sculpting processes.

Sorted for the busy artist, it takes away the pain of many traditional approaches so that one can spend more time imagining instead of solving problems. This add-on automatically adjusts the geometry nodes, shaders, and other settings. The result is an easy-to-use tool that allows users to design amazing terrains without any hassle.

- **Effortless Terrain Creation:** Easily create different types of terrains with little to no effort. With the Dynamic Terrain add-on, you can quickly create a variety of terrains.
- **Node Optimization:** Integrated movement through geocodes, shaders, and node groups in a user-friendly application interface.
- **Customizability:** Editable parameters are alterable in real time to fit the specific needs of users.
- **Procedural Textures:** Manipulate and apply textures with ease to create intricate surfaces without much effort.
- **Asset Integration:** Modify landscapes by adding rocks and trees for more immersive scenes.
- **Weight Paint Precision:** Accurately shape and profile the distribution of assets using the weight paint feature.
- **Advanced Features:** Lakes and Rivers: Add water features to landscapes with preferences.
- **Edit Mode Support:** Sculpt terrains during edit mode or near the geometry.
- Advantages
- **Time Efficiency:** Restructures workflows, enabling artists to concentrate more on the creative aspects.
- **User-Friendly Interface:** Readily available for both novices and experts.
- **Versatile Applications:** Fit for game surroundings, animations, etc.
