Blender Market - Hair Proxy V1.3: This addon blends the best characteristics of hair curves and mesh objects.

Hair dynamics and shape keys could be incorporated into hair curvatures with just a few clicks.

Use the shape key to design alternative hairstyles, tweaks, or perfect loop animations.

Do you want your character's hair to fall behind the shoulders naturally? Sculpt an outline to allow hair dynamics. Then let Blender take care of the rest.

Do you want to create sculpted adjustments following the simulation of hair dynamics? Click apply to sculpt, and you're ready to go.

Mesh proxy was designed to make it possible for meshes' features (shape keys and physics, rigging, mesh modifiers, etc.) to be applied to hair curves. Geometry nodes modify the shape.
