These six classes are bite-sized so that you can watch each one in a single sitting. Each class is between 20 - 40 minutes long. They show you the step-by-step process of capturing the photo on the box cover, starting in the field with composition and camera settings. Finally, the bundle progresses to moving into the studio so you can learn how the post-processing was done. Six classes where Tim takes you with him into the field. Watch as he chooses a composition, sets up the camera, takes the photo, and retouches it in the studio. No step left out! You see EVERYTHING so you can copy what he does!.

Classes included in this amazing bundle:

- The simple camera trick creates a stunning foreground class. (32 minutes of content).
- How to create fog and sunbeams when there is no fog class. (34 minutes).
- How to create a natural-looking HDR photo (without the dreaded "HDR look"). (32 minutes).
- How to find a simple composition in a busy forest class. (27 minutes).
- How to shoot fireworks photos class. (20 minutes).
- How to capture sunbursts without distracting sun flares. (32 minutes).
- Get started now and watch the classes; start and stop anytime. Lifetime access!

What is Photography Bundle?

A "Photography Bundle" typically refers to a collection or package of photography-related resources, tools, courses, or products that are bundled together and offered as a package deal. These bundles are often designed to provide
