Jerryflow V2 v2.0.1 (Win, Mac):

JerryFlow V2 is an enhanced extension for Adobe After Effects that builds on the original JerryFlow script, offering a customizable UI to streamline workflows and expand creative potential.

Key features include Instant Curves for precise keyframe adjustments and Preset Curves that allow users to create and save up to 20 custom presets.

Users can apply pre-built effects like Warp Stabilizer, 3D Camera Tracker, and Force Motion Blur, each with adjustable parameters for seamless video transitions.

The Shakes feature provides improved and customizable motion effects, including popular options like Wave Shake and Quick Shake, with plans for a Custom Shake Builder for personalized shake effects.

The Asset Loader enables efficient asset management, offering drag-and-drop functionality, one-click application, and asset previews, though it requires users to source their own assets.

JerryFlow V2 is designed to simplify technical tasks, allowing creators to focus on their vision with professional-quality results.
