After Effects

"Liquid explosion" typically refers to a visual effect or design style that simulates the dynamic and fluid movement of liquids, often in an explosive or splashing manner. This effect is commonly used in various forms of digital art, animation, graphic design, and motion graphics to create eye-catching and dynamic visuals.

Liquid explosion effects are versatile and can be applied in various creative contexts, including advertising, music videos, video games, and digital art. They are often used to create visually stunning and memorable visuals that capture the viewer's attention.
