CSiXRevit

Modeling

Structural modeling can be done in ETABS®, SAP2000®, or SAFE® or in Autodesk Revit® Structure and then later be synched up.

Data Transfer

The user has full control over what model information will be transferred between CSI Software models and Autodesk Revit® Structure models.

Intermediate Data Exchange

All CSI Products use the same intermediate data exchange file (.EXR) to control model data exchange.

Parametric Mapping

CSiXRevit will support both direct section mapping of standard steel sections and also parametric sections that have been defined in Revit® Structure
