introduction

This file is very simple, clean, and easy to edit with basic knowledge of AfterEffects software.
No plugins are required, it is easy to work on the timeline. Very simple to change the theme color. Easy to duplicate the slide.

General

All slides are placed inside the Digital Tech Integrated Slideshow composition. You can change the slide order by changing the respective layer order. The theme color controls are placed inside the MainComp composition over the Master Color Control layer.

Edit Slide

Example:

1. Double click over the slide_01 comp on the project panel to it placed inside the slide_01 composition.
2. Edit the text and animation as you need (see Figure 01). it is placed inside the respective text comp eg: Text_Slide_01
3. Double-click over the Background_PlaceHolder_01 layer that is placed inside the slide_01_Holder to change the background media.
4. Import the Image/video and place it inside the Background_PlaceHolder_01 (see Figure 02).

Duplicate Slide

- To duplicate the slide follow the below steps.
1. Duplicate the slide_01 and slide_01_Holder comp on the project panel that you want to replicate.
 2. Duplicate the Background_PlaceHolder_01 that placed inside the slide_01_Holder comp.
 3. Double-click over the new duplicate slide_num on the project panel.

- VIDEOHIVE

4. Then replace the all slide_01_Holder comp that is placed inside the new duplicate slide_num comp. See the figure (select the slide_01_Holder layers on slide_num comp and select the new duplicate slide_num_Holder on the project panel + Press alt key and drag it over the slide_01_Holder layer)

Change Theme color

The color control is placed over the Master Color Control layer that is placed inside the MainComp.
The entire slide color will be changed using this color control. If you need to change the color for a particular slide, you need to remove the code that was placed on that layer and then change the color.

The below figure 04 explains the color control

What is Digital Tech Integrated Slideshow 4K?

Digital slideshows are multimedia presentations that typically include a series of images or videos accompanied by audio, text, or other elements. The mention of "Integrated Slideshow 4K" suggests that it might be optimized for 4K resolution, which is a high-resolution format commonly used in digital media.
