

# Clear Supply – Tenet

2025-02-10 16:52:03 label 我要反馈 下载页面

The product download is comprised of 50 files. Tenet is an easy-to-use image blending tool that works with just the power of one click. Contrary to double exposure, Tenet does not require any attention to the composition of the source material. Simply add your images and then mask it with any of the dithered PNG assets to create distinctive compositions that require little effort. A single background image and one masking input will create a unique composition. Different inputs are able to be combined without discord. It is possible to further explore the possibilities by adjusting and moving the masks, or by using them as overlay elements - the possibilities are endless.

The set includes 50 dithered custom PNG masks for you to play with (at an enormous 12000 x 8000 pixels to downsample).

## Gfx plugin details of Clear Supply – Tenet

The product is in the **Photoshop category**, for more information about this post you can click on the home page link in the sidebar.
