- PSD Template
- 2075x1575px, with 75px of bleed
- RGB 300 DPI
- Simple and quick to edit
- Layers are Organized
- Smart Object
- Color Adjustments

What is an Artistic photo?

"Artistic photo" is a broad term that refers to a photograph created with a focus on artistic expression and aesthetics rather than simply documenting a subject. Artistic photos often involve creative elements and techniques that go beyond standard photography.

Artistic photography is highly subjective and open to interpretation, allowing photographers to use their creativity and artistic sensibilities to produce images that are visually striking and emotionally evocative. It's a form of visual art that goes beyond mere documentation and aims to engage the viewer on an emotional or intellectual level.
