- Beware of the layers of complexity in technical terms.
 - Find solutions faster, and take on the next challenge earlier
 - Ideal for teams
 - Work is shared in a seamless way
 - Harmonize across departments
 - Ensure that updates are safely integrated from downstream departments
 - Create and share tools that can solve group problems
-
- Make sure you have a pipeline running - The USD-optimised technology, several APIs, five commercial renderers, and an open-source Shotgun TK integration make Katana the Swiss Army knife of your pipeline.
 - Pioneering rendering - The Foresight Rendering workflows, made up of multiple simultaneous Renders and Networked Interactive Rendering, give artists a scalable feedback system for more rapid iterations.
 - Artist-Focused Lighting - Light at the speed of thinking thanks to the latest Lighting Tools, which allow artists to light entire sequences of shots using Katana's world-class multi-shot workflow.
 - Collaborative look development - Katana is designed to help drive the development of look-for heroes or large-scale assets while cooperating with shot production.
