- **AUTHENTIC CIRCUIT EMULATION.** Our actual time SPICE kind part based circuit simulation strategy permits to authentically catch the audio and feel of the analog counterpart in all subtleties. All vital parts of the original circuits including audio transformers, tube stages or passive filter networks have actually been consistently modeled.
- **SSE2 MAXIMIZED CODE.** DSP operations are pipelined using the SSE2 instruction set. This ensures the greatest feasible efficiency operation in spite of very intricate calculations.
- **AUTO-ADJUSTED OVERSAMPLING FOR MAXIMUM AUDIO OPENNESS.** Aliasing artefacts are successfully attenuated making use of a low latency linear stage Dolph-Chebyshev poly-phase design. The oversampling is auto-adjusted to your session's sample rate to save useful CPU power while providing the most transparent noise feasible.
- **HIGHDPI/ RETINA ASSISTANCE.**
- All our plug-Ins sustain high pixel thickness on Mac OSX as well as Windows to bring you one of the most satisfying customer experience above DPI screens. Please refer to your manual to find whether your DAW is HighDPI capable if you're dealing with Windows.
