1500+ Transitions for After Effects VH-37533954:

ATOMX Extension

We created previews for every transition so that you can quickly apply and select them. It's as easy as just one click!

Automatically fit any aspect ratio

The transitions will automatically adjust to the dimensions of your composition once they have been applied. They work well in any aspect ratio, be it vertical (9:16) Wide (21:9) or square (1:1), and more. Additionally, at any point, you can alter their resolution with a single click with ATOMX!

Speed Control of all changes

Every transition has the capability to alter the speed of animation. This lets you create distinct durations of transitions that match the video you are using.

TRY Transitions

We've created special target transitions for some of the spin and zoom transitions. This can make your video look more exciting!

- **1500+** Transitions across **10** major categories
- **ATOMX** Extension
- **Sound FX** included
- **Control of Effects**
- It works is compatible with **any resolution** as well as **the Aspect Ratio**
- It works seamlessly with **every Frame Rate**
