13 little (but amazing) tools in 1 toolbar to assist your everyday struggles!

The tools:

Calc

Calc is a small calculator. It is not like the usual calculator but provides to you personally areas, one to compose your issue and the next to show you the answer (who actually uses the + and - buttons on a pc calculator anyhow!) . The best thing about this is that you may assign names to numbers and utilize the title! Eg. Height = 125px. Margin = 10. (Height * 5 + width * 4) * 2 = 1580.

Clear Cache

It does exactly what it states it does. It immediately clears all of your type of cache. Eg. When working with scripts which does not work well with After Effects cache-system it is always handy to have the ability to clean the cache immediately.

Color Matcher

Match two movies together with each other in just 4 clicks! Choose the shadows and highlights from the movies and Colour Picker manages the rest! What also makes Color Picker unique is the capability to dynamically alter the colours of this movie (assess xx:xx from the tutorial-video for more info).

ExpressIOn

Switch expressions or off with a press of a button! Can it on selected properties, property-groups, layers or all comps on your undertaking! ExpressIOn is also great if you inadvertently split an expression, such as deleting a coating and undoing it. Only press the button while holding down Shift and your expressions will probably be back on the right track!

Expression Baker

With a great deal of expressions can definitely slow down your work. Bake them to accelerate! Select one or more layers or properties and then bake everything! Your expressions are of corse stored. Simply delete the keyframes and trigger the expressions.

Hyperlink

Link could be explained like parenting but rather than inheriting properties, the properties are connected. You can connect anything to anything! The place to blurriness. The masks growth to the fractal sound's development. Really anything .

However, where Links electricity lies is in its own expression-linking. This permits you to apply sayings to your own properties from 1 location only, meaning in the event that you would like to modify the expression, alter just ones and the possessions will be upgraded! And since they're connected rather than parented, they'll act as though the saying has been written to them completely.

Mask Nudge

Press ones then use your arrow-keys to maneuver one more masks. In case your masks are keyframed that the keyframes will proceed also. You could even move the picture itself and depart the masks into their own position.

Title Exchange

Instantly rename"Blue Sound 5" from the job panel to"BG" since the title is at the job panel. Additionally works the other way round. Rename the layer to its title in the job panel. You could even pick a layer and press on Name Exchange while holding down Alt to show the document in the job panel.

Printing Display

Press to store your present picture without needing to render! The alpha is obviously included! Just be certain that you have your trailer on complete to find the highest quality.

Reset Timespan

When making in AE, should you cancel the timespan will begin from where you stopped. That is often not exactly what you need when you are going to re-render. Reset Timespan resets it to exactly what you've planned it to be!

Script Launcher

Press, Kind and launch! Script Launcher is a small and efficient script launcher that allows your hunt through all of your script in any place and start them! If they're inside the ScriptUI folder, then they'll start as dockable! Attempting to start them dockable but do not want them at the ScriptUI folder? Do not worry. Script Launcher includes a tool to make shortcuts for your scripts and put the shortcuts within the ScriptUI panel, which makes them dockable without having to be present!

Search and Replace Expressions

Little but nonetheless effective search tool to search and replace expressions from the chosen possessions, property-groups, layers or at the Entire project!

Toggler

Loving how it's possible to toggle settings in any software, just using the arrow keys? Toggle let's you do this on all possessions inside After Effects! Choose any property or possessions, press Toggle and sit in your own keys! Possessing a layer chosen and you'll toggle the modes rather to immediately discover the look you're searching for!
