SC Secure Soft PDF Signer Server v12.0

2026-11-26 13:35:54

PDF Signer Server is a Windows application that digitally signs PDF documents in bulk and automatically, with X.509 certificates. It signs a single document or a complete folder, watches a folder and signs the new documents without user intervention, sends the signed documents by e-mail, uploads them to an FTP server, archives the originals and keeps a log of every action. It creates PAdES signatures (ETSI EN 319 142-1, baseline levels B-B, B-T, B-LT and B-LTA), the format used for advanced and qualified electronic signatures and seals under the eIDAS Regulation (EU) No 910/2014, and it works with certificates from the Windows store, from PFX files and directly from smart cards, USB tokens and HSMs through the PKCS#11 interface.
