There is a distinct deepness and richness when you look at large format film images.

The process of working with this medium requires your body to slow, become more in tune with your camera as well as your photographer, and be present. It's a practice of mindfulness. Our brand-new FOURXFIVE preset collection will provide this experience with the magic of your work.

Inspired by film 4x5 The FOURXFIVE collection includes five colors plus one B&W preset. Additionally, there are three distinctive film borders that can be easily applied with a single click, adding the look of the film to your photos.

Modify your edit further to create that big-format film appearance using the Blur, Contrast, and Dark tools. The available Color profiles and BW Density profiles can increase or reduce overall image density as well as contrast.

Make artwork that stands out. Be aware of the depth and the dimension of FOURXFIVE.

INSTALLATION & SET REQUIREMENTS

This set needs Adobe Lightroom's subscription to: the LR Classic (v11+), LR Classic CC (v11+) or LR CCC (v5+) or Adobe Photoshop ACR (v14+).This set is built on our custom creative profiles that we have created specifically for working with RAW images. The FOURXFIVE collection includes five colors and five B&W presets. The Presets and Profiles were created and extensively tested using RAW documents of Canon, Nikon, Sony, Fujifilm, Pentax, and Leica. Prices are in US Currency.
