Batch Produce Coating markers from text

Marker Typer for After Effects generates a heap of coating markers out of text mechanically divide at words, letters or commas. This may be exceedingly beneficial in mark triggered cartoons or merely in overall job business.

How it operates:

1. Pick the coating Or layers which you want to include markers also.
2. Type the text out You want to be changed into markers.
3. Pick to divide That text into different letters, words, words, or words in commas.
4. Decide the number of Frames to place between mark.
5. Produce markers!

Additional Gear:

Nudge Left & Right

If You want to nudge some mark around, simply set the play head involving the mark you need to add area and nudge. Every click will probably nudge the mark by the number of frames given at the UI.

Delete Markers

If You want a fresh slate, so this button will save yourself the tedious procedure for Cmd-clicking all those small markers simply to eliminate them.

Produce Your Own Shorthand

Sometimes what you need your Markers to state is not readily typeable in a sequence.

You're able to use the settings panel to establish your personal shorthand.

Bonus: Should you set a shortcut to get"SKIP", or use"SKIP" in term or comma manner, Maker Typer will bypass putting a mark in at the point giving just a tiny pause if utilized with mark based cartoon.

Works Using Comp Markers

If You are using After Effects CC 2017 or over, Marker Typer will provide to produce, Nudge, and then delete mark when no layers are selected when conducting any Of its purposes.
