FrameRestorer makes use of Motion Interpolation in order to solve the issues that arise with video such as conversion and capture issues to visual effects to clean up work.

How can we solve the issues with video to clean up the work?

We can solve the issues with the video with the "pt_FrameRestorer 2" plugin.

Where can I download the product?

After subscription, You can download it for free from here.

Capture and issues with conversion

- Restore duplicate or dropped frames due to capture issues on cinema cameras that use digital technology.
- Replace damaged, broken, or damaged frames.
- Insert frames in order to fix the stutter created by the conversion of frame rates.

Clean up of footage

- Create tracked patches that remove unneeded parts of a frame or focus slips by interpolating between frames from either.
- Remove motion blur artifacts and motion blur from stabilized footage.
- Reduce light flickering caused by incompatibility between the rate of light refresh and the shutter speed of the camera.
- Create interpolated clone sources to aid in the removal of dirt.

New Version 2

- It is much faster to find duplicate and missing frames. It is also faster to find duplicates.
- It is compatible with the RE: Vision Effects Twixtor to provide better interpolation.
- The new insert frame feature will resolve footage that stutters.
- A new feature for cloning sources to aid in the removal of dirt.
- The reduce function is able to create automatically tracked patches that substitute sections of images.
- The TimeWarp limit is removed to 5000 frames it works with any length of footage.
- Combining different options in order to regulate interpolation methods.
- Repeat markers assist in identifying repeated frame patterns.
- Contextual help built-in that includes a Google Translate button.

What is pt_FrameRestorer 2?

The "pt_FrameRestorer 2" is a plugin available for Adobe After Effects. Plugins like "pt_FrameRestorer" are typically designed to extend the functionality of Adobe After Effects, a popular software application for video post-production and animation. These plugins can help with various tasks, such as improving video quality, restoring damaged or low-quality footage, enhancing motion tracking, and more.
