

Motion Array Split Screen Pack – FHD

2025-02-10 16:59:11 label 我要反馈 下载页面

Motion Array Split Screen Pack – FHD: Split Screen Pack Split Screen Pack FHD is a fantastic package that includes 20 screen layouts that are animated for Adobe After Effects. Four different versions let you show multiple videos and photos across one monitor. It is possible to choose between non-animated and animated layouts, layouts with frames, and layouts without frames. Grid layouts are available for 2, 3, and 5 videos shown on the screens. Each layout is also accessible, featuring animated offsets in the beginning. Drag and drop the layout onto your video.

- After Effects CC 2018
- 1920x1080 (HD)
- No Plug-Ins

What is Motion Array Split Screen Pack

A "Split Screen Pack" typically refers to a collection of resources, templates, or assets designed for video editing or presentation software to create split-screen effects in videos or images. A split screen is a visual technique where the screen is divided into multiple sections, each displaying separate content simultaneously. This effect is commonly used to compare or contrast different elements within a single frame.

Split screen effects can be creatively used in various types of videos, including comparisons, before-and-after demonstrations, storytelling, tutorials, and more. These packs are designed to streamline the process of creating split-screen layouts, making it easier for video editors to achieve engaging and informative visual presentations.
