- Desktop and Mobile variant
- Quick rendering

NB: Use high-resolution Photographs for the very best outcome

- **Compatible with:** Adobe Lightroom

What is Earth Presets?

"Earth Presets" generally refer to a set of predefined settings or configurations used in various applications, particularly in the context of photography or graphic design. These presets are designed to apply specific visual effects or adjustments to photos or images to achieve a desired look or style, often related to natural landscapes, environmental themes, or the Earth's aesthetics.

For example, in photography and photo editing software, you might come across Earth Presets that are tailored to enhance outdoor or nature-themed images. These presets can adjust parameters like color saturation, contrast, brightness, and tone to create a particular atmosphere or mood in the photo, such as making it look more like a lush forest, a serene beach, or a dramatic mountain landscape.
