Each model was created in the most detailed way and accurately represented species used for Corona Renderer, VRay  
Renderer, and FStorm Renderer in 3D Max.

Our FBX format contains all textures, which can be inserted into any other software.

Our SketchUp file format supports three rendering engines: VRay, Thea, and Enscape, with proxies included. SketchUp Files  
are completely capable of being used with Skatter. VRay 5 is compatible.

Users can choose Blender using Cycles and Cinema 4D with VRay 3.6 and Corona Renderer.

The models we use for MESH models need 3D Max 2018 or above and a minimum of Corona 3.0, VRay 3.6, and Form 1.35.  
We also offer the complete Forest Pack library for all three renderers.

List of Species:

- Aesculus parviflora
- Arctostaphylos Uva-ursi
- Aucuba Japonica
- Callicarpa Americana
- Carex morrowii 'Ice Dance.'
- Carya Ovata
- Catalpa Speciosa
- Cephalanthus occidentalis
- Cladrastis Kentukea
- Fagus Sylvatica 'Purple Fountain'
- Hydrangea Arborescens 'Abetwo'
- Kalmia Latifolia
- Physocarpus Opulifolius
- Toona Sinensis 'Flamingo'
- Zenobia Pulverulenta 'Raspberry Ripple'
