Games

An axiom is a tool that can be used to create effects for games, TV, and film! Since Axiom is integrated into Houdini, you can use all of the SideFX Labs tools to bring your ideas into Unreal and Unity.

Simplistic Workflows

You can achieve the results below with just a handful of Axiom Nodes (three, to be precise). With Axiom, we strive to simplify your pyro requirements without sacrificing quality.

Fast Iterations

You will quickly obtain various outcomes in just a few minutes by making a few modifications to the emitter and solving the program. These three simulations took around 15 minutes to simulate.
