8UP Daedalus Notes: Do not be afraid of the reaper as you ascend to the top of the world, making amazing 8-bit adventure music using these instruments. You can speed up your music once you've finally gotten some air to breathe and create uplifting music while you climb to the top of the mountain. Maybe some creepy fortress tracks in your dark times (and some terrifying clown music in your crazy times).

The instruments in this collection depend upon the waveform of the square. One of the significant distinctions between the synths is their sampling attack, which can range from soft and gentle to sharp or abrupt. The sole stab instrument (as bass and snare instruments) uses an inverse triangle. Snare drums and the kick are noises that sound like a simple hum, with the kick using a concise duration of the kick to distinguish itself from the snare.
