MotionVFX - mLeaks:

MLeaks: 50 Professional Light Leak Effects
MLeaks is a collection of 50 high-quality, 2K organic light leaks designed for use in video editing software like Final Cut Pro X, Apple Motion, Adobe Premiere Pro, and other NLEs that support blend or composite modes.

The light leaks, captured with RED camera technology, are provided as ProRes 422 MOV files at 24 fps resolution (2048x1152).

To use MLeaks, drag the file onto a new layer above your footage, select a suitable blend mode (e.g., "Screen"), and adjust opacity, contrast, hue, or saturation for enhanced effects. Compatible with Apple Silicon and Intel chips, the package requires only basic compositing software to create professional-grade visuals.
