Unleash the full potential of your creativity with Quick Snow for Blender, offering unparalleled control over your winter scenes while saving you valuable time.

Geo Snow Mesh:

- Create snow mesh in a single click with the magic of Geometry nodes.
- Real-time snow mesh creation with Geometry nodes for rapid results.
- Effortlessly control Geo Snow coverage with the ray cast feature.
- Generate Geo Snow mesh masks with procedural noise textures.

Environment Effects:

- Packed with built-in presets for controlling snow direction, velocity, turbulence, fog, and more.
- Achieve photorealistic environments with one-click ease.
- Automatically create dynamic snow material for any object, even supporting foliage shaders.

Snow Displacement:

- Add snow displacement to objects using experimental adaptive subdivisions.
- Animate snow coverage values or any shader parameter for dynamic scenes.

Auto Gravity Rotate:

- The auto gravity rotate feature ensures the snow always stays on top of the object, making it ideal for animations.

Control Everything:

- Easy adjustments for snow coverage, blending, displacement, material settings, and more.
- Infinite control over 3D scene settings through user-friendly panels.

Blending Features:

- Average blend calculates height based on object geometry and normal map for realistic blending.

Resources

- Pixel blend calculates height on every pixel based on object geometry and bump/diffuse map.
- Blend softness controls the softness of snow blending to the surface.

Snow Material Features:

- Fully customizable snow material with options to change tint, softness, wetness, AO, and add glitters.
- Auto Scale feature adjusts snow texture scale according to object scale for realistic proportions.
- Catalog of 16 high-quality materials in 1K, 2K, and 4K textures with full PBR shaders.

Snow Mask Options:

- Gradient mask removes snow along the z-axis from the bottom, which helps create grass or snow-free lower parts.
- Texture mask combines procedural noise and musgrave texture to create custom snow masks.
- Vertex paint mask allows manual painting of masks to add or remove snow from specific areas.
- Edge and cavity masks add or remove snow in cavities, faces, and edges.

Snowfall:

- Create an entire snowstorm scene with one click.
- Quick animated snow fog for added realism.

What is Blender Market – Quick Snow?

"Quick Snow for Blender" is an indispensable add-on crafted to effortlessly transform your scenes into enchanting winter wonderlands. With a simple click, you can drape your scene in dynamic snow, offering a range of features to expertly control your shaders.
