Blender Market - Pidgeon Tool Bag:

The Pidgeon Tool Bag is a comprehensive add-on suite designed to streamline the 3D pipeline within Blender, consolidating multiple high-performance tools into a single, user-friendly package.

Developed with a focus on organization, realism, analytics, and quality rendering, this suite provides an extensive range of features to enhance productivity and render quality across diverse projects. From clean node management and realistic sound implementation to advanced denoising capabilities, the Pidgeon Tool Bag aims to meet the high standards of professional artists and animators. Ongoing development promises further innovative tools to enrich users' workflows.

Super Organized Nodes: Efficiently arrange Geo-, Shader-, and Compositor-Nodes for a clean workspace with minimal clutter.

Super Real Sound: Integrate realistic sound effects that align with animations for enhanced immersion.

Super Easy Analytics: Track time and gather detailed insights into scenes, ideal for professionals needing comprehensive data analysis.

Super Image Denoiser (SID):

- SID-Regular:** Optimized for still frames and animations, providing high-quality denoising at reduced samples.
- SID-Temporal:** Tailored for animations, ensuring frame-to-frame consistency with superior artifact control.
- Quality Levels:** Choose between Standard, High, and Super for the optimal balance between quality and speed.
- Customizable Pass Denoising:** Select specific render passes to denoise, with auto-detection for scene-specific settings.
- Advanced Settings:** Configure working directories, Multilayer-EXR compatibility, and frame compensation for smooth results on motion-heavy animations.

Artifact Control: Advanced Temporal Error Detection identifies and corrects common denoising artifacts.

Super Advanced Camera:

- Camera Control:** Easily select and manage cameras within the scene.
- Render and Resolution Settings:** Adjust resolution, frame range, and preview settings for efficient rendering.
- Color Grading and Effects:** Quickly enhance images with post-denoising effects, including motion blur adjustments.

Animation to Video: After denoising, the SID tool can convert the image sequence into a video file for streamlined output.

The Pidgeon Tool Bag is continually evolving, with future features planned to further elevate the creative potential of 3D artists and animators.
