Learn to Draw Cute Kawaii Characters: This brief and straightforward class explores what makes a character cute and how to make your unique characters to utilize for basic drawing and scrapbooking, card art, and many more. We will go through all the steps in creating character designs, beginning with gathering concepts and drawing practice before coloring and completing your designs. The entire course will be conducted using Clip Studio Paint. However, the course can be converted to Procreate, Adobe Photoshop, and other digital art software. Additionally, you are encouraged to take the old-fashioned route and create your characters using pencil and paper.

The fundamentals you'll learn in this course are the fundamental proportions of cute characters and an introduction to color theory fundamentals. In addition, we will discuss some good drawing techniques and the best ways to refer to different sources

This class is designed to be relaxed enough for novices or casual artists but could also provide fresh perspectives for experienced artists. This class is excellent for those who want to build their abilities or expand their horizons. I am looking forward to seeing you with me in the class!
