Forester is a plug-in to Maxon Cinema 4D that provides tools to create natural elements, such as trees, plants, rocks, and more, and their geographical distribution across polygonal terrain. Forester comprises four modules, which are Forester Trees, Multiflora, MultiCloner, and Forester Rock. Forester is among the most popular and successful Cinema 4D plugins because it provides a fully procedural approach to creating environments inside the familiar Cinema 4D workspace.

FAST TREE CREATION

Forester's simplified workflow allows the user to design trees from scratch or begin by using a library of tree items and create beautiful trees in no time

EXTENSIVE TREE LIBRARY

The Forester tree library is flexible enough to meet most requirements. Plants and trees created by users can be saved to the Cinema 4D preset library for future use.

INDUSTRY Leading Wind EFFECTS

The only tool that creates plants can come close to the real-world accuracy and simplicity of Forester's HyperWind software that Forester gives to its plants and trees
