QUEST 06 (FILMIC COLLECTION).

This sixth installment of the Quest Signature Series brings you a beautiful soft & filmic collection that is focused on tonal accuracy. It's perfect for those who aren't willing to compromise on the beauty and color in this world.

There are three options available to suit your aesthetic. The Emulsion profile can also be used to create a stylized filmic look.

AQ06 I

Simple, clean, and true. Dynamic adjustments are used to achieve stylized effects with minor tonal shifts. This allows for accuracy without the undesirable sterile appearance that digital cameras can create.

AQ06 II

To achieve a soft, smoother, and less cluttered look, a shift in dynamics is required.

AQ06 III

For a more stylized look, muted highlights and increased contrast are both options.

EMULSION PROFILE

For a romantic look, use rich skin tones, pale pinks and minty greens. To change tonality, adjust the profile slider. This will allow you to switch from a highly accurate color to this stylized look with film stock.
