7 Luts that I continually use to color grade my footage!

- Blue Ocean
- Forest Green
- Night Lights
- Vivid
- Dream
- Purple Dank
- Orange and Teal

What is a LUT? Simply put, suppose it like a filter for your video footage. You observe a LUT to one of your clips and the statistics interior that LUT right away coloration corrects your photos to appear a positive way.

These will work in Premiere Pro CC, DaVinci Resolve, FCPX, AE. These additionally work in Photoshop CC for enhancing your photos.

These are no longer designed for Adobe Lightroom. If you cannot SEE your luts in Photoshop, make sure they are hooked up in the proper region and RESTART photoshop.

Thank you for helping my work! It is notably appreciated!

Please DO NOT download these from your cellular phone! Use a laptop or laptop computer!
