### Video Cut&Crop&Join v4.2 (Mac):

This video cut and crop tool allows users to easily cut interesting video clips, compress them to a small size, and convert them to various formats for sharing online.

#### How to Use:

##### Cut Videos:

- Drag and drop the video file into the app.
- Select the desired video clip and conversion options.
- Click "Submit" to process the cut task.

##### Merge Video Clips:

- Follow the steps for cutting videos.
- Select the clips to merge, right-click the task list, and choose "Merge videos" to combine the clips.

- **Fast Video Processing:** Efficient video cutting, merging, and cropping using FFmpeg, with support for popular video formats.
- **Powerful Clip Selection:** Handy tools for precise video clip selection.
- **Advanced Cropping:** Video frame cropping that significantly reduces output file size.
- **Rich Conversion Options:** Offers extensive video conversion features, including iCloud sync.
- **Multi-task Support:** Ability to handle multiple conversion tasks simultaneously.
- **FFplay Integration:** Built-in FFplay for quick video preview and snapshot-based playback, improving clip selection accuracy.
