MotionArray Prismatic Effects 1036672: This special pack of prismatic effects gives a bright tinge of brightness. The effect gives your images an authentic and realistic look light. The prismatic overlays use flares on the lens, light rays, bokeh light leaks, and double exposure effects. Have you forgotten to apply the star filter to your lens? It's not a problem. You can make the star effect by combining highlights with just one click. Use it for any video, romantic, wedding dream, music, or promo.
