Excel Online provides the users and developers the ability to read, write as well as update Microsoft Office with the very easy to use as well as bi-directional drivers of the data. The online office has the ability to combine the most common office features as well as the real possibilities for co-authoring so that the teams at the school as well as the home can have the ability to collaborate on the documents that are being shared along with the presentations and spreadsheets. Excel Online continues to work with the full power of Word, PowerPoint, and Excel applications installed on the user's PC or Mac. It can work with the applications of the office that are being installed on the user's desktop so that the user has the ability to choose the process as to how he wants to work. With the use of Excel, online dessert can dynamically collaborate with the co-authoring, which is real-time, or in case the user has an office already, then he can continue the work with full power.

can share as well as collaborate with others in real-time and also save everything online in OneDrive. The creation of the document as well as the spreadsheet, along with the presentation of the online or even the desktop version of the Office, is possible with the utilization of Excel online. It should be noted that Microsoft Excel online is free of cost, and the online version of it includes the function of the charts tool and everything that the user will expect from a spreadsheet. It has been stated that Microsoft Excel has the same function and abilities as Excel, and they are capable of helping the users on the developers and including tools go-to process of analyzing, gathering, creative visualization, collaborating with co-workers, and so on.

CData Drivers for Excel Online is a fantastic option that can offer all the same features or even take advantage of web

add-ons. It can offer the users and the developers more than over 400 functions and have the support for additional functions if the user inputs them correctly except for some. Most of the features of Excel are being supported by Excel online and can be completed as well. It can provide the users and developers the power to collaborate the abilities and allow the user to sync the spreadsheet to different web apps.

Key Features of **CData Drivers for Excel Online** :

1. **ETL & Replication:** For the process of computing, ETL stands for extract transform and finally load. This is a general procedure for the process of copying data from one source into a different system with the help of the representation of the data in a different form. The process of extracting became very popular in the year 1970, and it is often used in the data warehousing process. ETL, if it is designed properly, this system can extract data from the source system and enforce the quality of the data to be consistent in standard and also enforce the data quality to confirm the data so that the users can separate the sources and use it together. It is capable of delivering the data in the presentation format, which is ready so that the application of the developers can create applications for the end-user to make a decision.

2. **Data Management:** It can utilize Excel online information from database management as well as the applications that are popular and famous.

3. **Workflow & Automation:** It can integrate along with Excel online from some other available development technologies.

4. **Software Development:** According to IBM and the results of the research software development is a process that refers to a set of computer science activities that are mainly dedicated to the process of creating, designing, deploying as well as supporting the software. The system software can provide the users with a core function such as the system of operation, disk Management, utilities, the management of the hardware, and other operational necessities. The software itself is described as a set of instructions and programs that can tell a computer what it needs to do.
