Patchmaker is pleased to announce the third installment of the Synthwave Series. "Synthwave III for Serum" can be used to create Synthwave, Darksynth, and other genres that feature nostalgic analog synths that warmly create sound and modern beats.

Mixing contemporary methods of sound design and techniques, with classic 80's features such as dark basslines, lush pads, and dominating synth leads, we have all the production equipment you require to bring the sounds of the past into your next productions.

Incorporating influences from Synthwave artists like Perturbator, Carpenter Brut, Kavinsky, Com Truise, and Mitch Murder creates a very distinctive, professionally programmed package that you can't get elsewhere.

In the details, you can expect to discover 100 Serum presets as well as bonus sounds used during the demonstration.

Serum Patch list:

- Lead 27 presets
- Key 17 presets
- Syn 13 presets
- Pluck 5 presets
- Bass 16 presets
- Pad 11 presets
- Seq 3 presets
- Gate 2 presets
- SFX 5 presets
- Wobble 1 preset
