How to use

Step by Step

1.

- Make sure you have updated Photoshop and Lightroom to the latest version.
- You need **Adobe Camera Raw 10.3** (minimum) and **Lightroom Classic CC**.
- When you open Lightroom, click the Develop module and look at the top right-hand panel. You should see Profiles and a drop-down selection. If you do not see Profiles, you need to update.

2.

- Using Windows Explorer, or Finder on a Mac, go to the **Love Edits | Love Color Vol I** folder.
- If still zipped, unzip the folder. Click to select and press Ctrl-C (Command-C on a Mac) to copy the unzipped folder.
- If you are using Windows and the folder seems empty, you will need to download it.

3.

- Open Lightroom. Open Preferences.
- On Windows, this is the menu Edit - Preferences. On a Mac, this is the menu Lightroom - Preferences.

4. In the Preferences Dialog Box, click the “Show Lightroom Presets Folder” button.

5.

This will take you into the general region of folders where we can find the Profiles folder.

Scroll up and look for the Camera Raw folder. Open it.

6. Once inside the Camera Raw folder, go into the Settings folder.

7. Paste the “Love Color” folder into this Settings folder. (Ctrl- V on Windows, Command-V on Mac)

8. Close and restart Lightroom.

9. Click on the Profiles browser in the Develop Module and scroll down to the bottom to see your newly installed Love Color profiles.

10. Star * your favorites to add them to the drop-down Profiles quick menu and put them in the top of the Profiles browser.
