平面设计　　Photoshop

The Sentiments texture kit is composed of real classic Shades removed from our own set. That is my personal favorite so far, as I continue experimenting with everyone I find a new cropped blueprint giving the Individual textures an entirely new feel over a picture. We plan to make Vectorized textures together with these also because they include beautiful elements to style Work, but for today I hope you've got fun working with these for images/edits and photo compilations!

Dimensions & structure

All textures are in PNG format and may be re-colored, utilized For components / cropped in & piled.

Sizing - 4667 x 7000 px
