What is Scribble Elements?

Scribble elements, in the context of graphic design, video editing, and animation, refer to hand-drawn or doodle-style elements that resemble scribbles or sketches. These elements are often used to add a playful, creative, or whimsical touch to various visual projects. Scribble elements can include lines, shapes, symbols, or drawings created with a freehand or spontaneous style, similar to the act of scribbling with a pen or pencil.

Scribble elements can be created manually by drawing with a stylus or graphics tablet, or they can be generated digitally using software tools, brushes, or plugins. They are versatile and can be customized in terms of color, size, style, and complexity to suit the specific design or animation project.
