How to use tools for audio analysis in After Effects?

You can use "HUD Sound Analyzer 1".

Where can I download the product?

After subscription, You can download it for free from here.

What is a HUD Sound Analyzer?

A "HUD Sound Analyzer" is a technology or tool that combines aspects of Heads-Up Display (HUD) and sound analysis. HUD typically involves the presentation of information in the user's field of view, often in a transparent display, allowing them to access data without looking away from their usual viewpoint.
