The MASTER Collection

This Contains all 41 background presets from Atlas, Orion, Titan, and Europa, and 27 mobile variations from these collections.

The Master Collection will NOT include presets out of the Violet Collection.

This collection + the violet collection constitutes my whole Preset library, designed to provide you a killer workflow together with specialist end results.

These presets Won't only behave as a starting foundation to Start Your own edits, but also as an effective way that you understand how to edit by Breaking every preset.

All these 40 presets will accelerate and transform your workflow In Lightroom on either your desktop and cell phone.

The presets conserve skin tones, also operate well On both portraits and landscapes.

Contained in this group are 3 Editing Tutorials, in which I show you the way I edit my photographs using the master Collection presets and the way I clean up my pictures in Photoshop.

Along with these editing tutorials, I have also included A Camera Basics Crash Course plus a Portrait Photography Episode (in the Workshop Collection) at which I Discuss basic camera settings, principles of composition, color theory, illumination, Creating thickness, plus far more.

All my presets ought to be treated as a beginning Foundation to your edits. They frequently work with a single click, nevertheless, they Sometimes require tweaking (all of presets work just like that).
