91Vocals Halogen House Vocals (WAV): Halogen House Vocals delivers modern and upfront vocal hooks that are designed to drive your next anthem or announce the end of the line. It includes radio-ready vocal hooks and phrases, and adlibs that come in dry and wet versions that can be used to increase flexibility. Discover the ideal topline, or modify and chop clean acapella to make new layers and standout sound effects. Also, tight vocal stacks, harmony, vocoded layers, and much more.

All original royalty-free and original samples featuring the vibrant and strong voice of the singer Clare Dove. Recorded and mixed in-house with Producer Sam Cramer and the 91Vocals team using top-quality microphones as well as industry-standard equipment on the outboard. We chose our favorite performances from three sessions with distinct key signatures, and tempos. We also added a clear Polish and Production. Each loop was carefully recorded and key-tagged.

Please note that this sample pack is only vocals. The instrumental elements that are heard within the track demo are intended for use as illustrations only. The demo was created by Sam Cramer & Capsun.
