The HORROR JUMPSCARES collection includes everything you require to create terrifying and sudden shocks in your work. Stingers, risers, jumpscares, and more. All were created using a variety of materials, including synths, screams, strings, and even metal. These sound effects are essential for horror-related projects.

Gfx plugin details of Just Sound Effects Horror Jumpscares WAV-ViP

The product is in **SOUND EFFECTS** category , for more information about this post you can click on the home page link in the sidebar.

A Tool for HAIR-RAISING SOUND DESIGN

Make use of the sound effects to create creepy scenes and bring the tension to its peak with an unexpected jump scare. A raucous and terrifying sound is the mainstay of games and horror films that perfectly frame rapid-cut, action-packed scenes.

In the package are the 111 sound effects which guarantee goosebumps but aren't for those who aren't confident.

SONGS INCLUDED

Stinger:

- 77 Files
- 77 Sounds

Riser:

- 34 Files
- 34 Sounds

Rich METADATA

A well-organized library of sound effects can enhance your workflow and can save you much time. This is why all of our sounds are classified in accordance with the Universal Category System and embedded with descriptive metadata rich.

The UCS seeks to provide a uniform classification of sound effects. and a consistent file name structure, and ease of maintenance of a library of sound effects.

and much more

What is Horror Jumpscares?

Horror jumpscares are a common technique used in horror movies, video games, and other forms of horror entertainment to startle or frighten the audience. They are typically sudden, unexpected, and often accompanied by a loud noise or dramatic visual or auditory element. The primary goal of jumpscares is to evoke a strong emotional reaction, typically fear or surprise, from the viewer or player.
