Soundtrack Loops Foley V6 Sounds Of Mexico City: Introducing "Foley V6 – Sounds of Mexico City Sound Effects & Rhythms" from Soundtrack Loops. This release marks the eighth creation by musician, producer, and Foley designer, Edgar Lopez. Let's delve into what this title has to offer.

Spanning across a range of tempos including 90, 120, 150, and 180 BPM, this collection comprises a total of 202 samples. Edgar takes us on a captivating journey reminiscent of the classic glitch music from the early 2000s. If you're a fan of artists like Mouse on Mars, Matmos, and Uwe Schmidt, particularly their more whimsical compositions, then "Mexico City" is sure to bring a smile to your face.

The sounds within are infused with the genuine vibes of urban Mexico City—imbued with elements of chaos, urgency, impatience, vibrancy, grit, and atonalities. These elements are encapsulated in a diverse array of beats, including breakbeats, fractured rhythms (reminiscent of a classic glitch), equatorial street rhythms, stomping beats, and more. What sets these sonic treasures apart is the distinctive signature sound that permeates every Lopez collection in the Soundtrack Loops catalog—crisp, bright, and impeccably staged.

Beyond the beats, the one-shots folder invites you to explore the very essence of Foley and location recording. Here, it becomes evident that Edgar's perception of the world is one where each object has its rhythm, every noise transforms into music, every scenario becomes a song, and an abundance of joy and oddity can be found in every corner.

Included file

- 120 Royalty-Free Sounds of Mexico Sound Effects, Foleys, and Loops
- 82 One-Shots

Discover the vibrant and eclectic sounds of Mexico City in this release, where music and everyday life converge in a symphony of sonic exploration.
