**HUD GAME UI (Videohive 26768873) - AE Project:** HUD Game UI was specifically designed for the gaming industry. It features 38 HUD UI Screens, 18 HUD Hero Gadgets, and over 400 HUD elements. Every display screen has HUD elements. You can find the main features in this HUD UI Interface, HUD Warriors Screens, HUD Game Controllers Screens, and HUD Target Screens.

HUD UI Game has been expertly designed and organized. All of the main screens are grouped in a PREVIEW Folder. This makes it easy to find what you need and put together your professional HUD design. The vector-based elements can be edited and resized with the After Effects shape layer.

Smart Color Controller allows you to change the colors of your entire project locally or globally.

Its original size is Full HD 1920x1080, but it can also be scaled up to 4K based on its vector base.

Free Fonts Link is available in the help File.
