

Embarcadero RAD Studio XE6 Update 1

2024-12-18 23:04:46 [label](#) [我要反馈](#) [下载页面](#)

The Embarcadero RAD Studio XE6 was established in America and it was founded in the year 1993 but it was given to the public in the year 2000 and later to the private in the year 2007. Later it became a division that belonged to Idera Software in the year 2015. Until the year 2015, the Embarcadero was selling products such as the Rapid SQL along with the DB Artisan and these were the products that are now being sold by the main parent company directly. In the year 2008, the Embarcadero had acquired the Code Gear from the software of the Borland Corporations. The Code Gear owns a few applications that are developed products and the most important ones among them are C++, Delphi, and a few more. The RAD Studio XE6 is mainly a rapid application for the development which includes the C++ Builder and the Delphi.

Embarcadero Technology which is a leading provider of the solutions of the software for database applications development has launched Embarcadero RAD Studio XE6 which is a complete natively compiled app and a multi-device for the platform of Windows, Android, iOS, and Mac. As seen by many of the developers, the trend is going towards making everything move to the mobiles. Embarcadero RAD Studio XE6 is the most complete development of the software that develops solutions for building compiled apps that are native for Windows, Mac, and Android just from a single base of code. The first introduction of the C++ visual development for the apps of the Android has enabled the developers in the modernization of their Windows applications with the help of the VLC enhancement and gives an expansion to the mobile phones and creates high-quality apps quickly on many platforms as well as devices and increases the productivity of the developer up to 20 x. For Android, there is expanded support from the Embarcadero RAD Studio XE6 and it is the only solution in the market which provides integrated development which supports the development of the visual C++ application for Windows. Hence, the users are now able to create apps that are natively compiled for all the platforms being in the desktop or the mobiles and even wearable devices such as the Google Glass, and smartwatches. The Embarcadero RAD Studio XE6 also helps the applications of the Windows VCL and then picks features that make sense for the phones and can be easily interacted with the Windows application that is already existing. Embarcadero RAD Studio XE6 has made it easy for the user to connect with the services of the cloud and even Backend-as-a-Service providers. Embarcadero RAD Studio XE6 motivates as well as encourages the developers and the users to monetize the apps of the mobile by the in-app purchase functionality along with the advertisement. Selling of the contents can be done by the developers and the RAD Studio XE6 is responsible to support the networks that are on top like the Google Ad Mob as well as the Apple iAd.

Embarcadero RAD Studio XE6 Amazing Attributes

- The Embarcadero RAD Studio XE6 tries to make things very easy for its users so that they can make the best and the most of Windows 7 along with Windows 8.1. With the use of the RAD Studio, the developers of the program are able to update the VCL Windows Software.
- The RAD Studio XE6 and the Delphi XE6 along with the C++ Builder XE6 are very much available immediately right from the Embarcadero and the partners of the Embarcadero.
- The empowerment of the app developers is done by the Embarcadero RAD Studio XE6 in order to help the mobiles in the functionality.
- The developers can integrate along with the BaaS providers that are adding a great deal of functionality as well as platform services to the applications of mobile phones.
- The Embarcadero RAD Studio XE6 allows its users to move towards the cellular with the use of flexible tasks and works. The new tethering app present is responsible to permit the users to expand the Windows VCL to that of the cellular.
- With the help of the RAD Studio XE6, the developers can now provide high performance-based service such as the versions of the 64-bit the 32-bit apps.
