Low Poly Letters are my latest pack of letters and numbers in a Low Polygon. It includes symbols, numbers, and letters with build-up animations. All characters can be used in 5k, 6k, or 8k projects. There is also a sample scene in the project with 8 placeholder videos or images. No plugins are needed. There are many customization options available for the template. Each character can be customized individually. You can also activate a cardboard skinned version. It can be used for all kinds of typography projects, and you can also use it to create cool animated letters in low poly.
