**Aescripts – Compound Matte v1.5.5 Win/Mac:** Combine, Subtract, Intersect and remove mattes using an intuitive interface!

### The Full Matte Operation

It is possible to have several matte layers on one layer and control them via four modes:

- Merge
- Subtract
- Intersect
- Exclude

It's all in an extremely simple to navigate drag interface!

Create endless matte layers which are simple to view and manage.

It is important to note that our tool does **use HTML0** and **does** not make use of this Set Matte effect and in many instances, it removes the need for After Effects internal track matte.

- It works on all kinds of media (Images/Video require pre-composition)
- Create multiple matte layers for each source layer quickly
- Manage and create unlimited mattes
- A responsive UX
