Aescripts Fresh Trim v1.3: Fresh Trim is designed to help organize your timeline by quickly trimming layers according to various features. You can trim the out-point and in-point of a layer using the correlating button in all options. You can also cut only the in-point by pressing CTRL and the point out by pressing the alt key.

How do you cut the selected layers to each layer's top and bottom lines?

You can perform the trimming operation using "Aescripts Fresh Trim."

Where can I download the product?

After subscription, You can download it for free from here.

What is Aescripts Fresh Trim?

Aescripts is a platform that offers a variety of scripts and plugins for motion graphics, animation, and visual effects software, particularly Adobe After Effects. These scripts and plugins are created by third-party developers and designed to enhance the software's functionality.

"Fresh Trim" could be a script or plugin developed by Aescripts or a third party designed for trimming or editing tasks in video editing or motion graphics. The term "trim" is commonly associated with adjusting a video clip's in and out points or a layer in video editing software.
