

Aescripts Automated Video Editing for Premiere Pro v1.0.3 (Win, Mac)

2025-02-10 16:39:32 [label](#) [我要反馈](#) [下载页面](#)

Aescripts Automated Video Editing for PR v1.0.3: Automated Video Editing lets you automate the entire video editing process per the music or other rules you follow. Import various music and video clips to make simple adjustments, and you will get a wholly edited video synced with the music, which can be adjusted easily when needed.

Reduce manual editing time: Promos and parties, VJ Videos, Weddings, and more.

Workflow

When you click "Create Folders and Sequence,"series and two folders are created (one file for music and the other for video files)—import video files to the video folder. Then, add one music file to the music folder.

Modify the settings for editing video within the UI to your liking, and then click "Do It." It may take a while to finish the task based on the duration of the edit, the speed of your computer, and then select.

Tutorial

A brief tutorial on how to use Automated Video Editing for Premiere Pro and how you can combine the script's potential with the new feature in Adobe "Automatic Scene Detection.'

- Automatic Video Editing uses an audio volume threshold (with the sensitivity controller) or the duration of the music between each video clip.
- The Random Video option.
- Option to Repeat Video.
- Limit Shot Duration option (Minimum shot duration, Maximum shot duration).
- Sequence Size and Frame Rate can be adjusted.
- The beginning of each clip (Random or beginning).
- Opacity Dissolve Control (also include the length of each dissolve).
- Scale Option for all layers within Comp (reframe or the scaling animation).
- Color Correction.
- Support for long-time duration videos (for instance: GoPro footage) and regular short-duration video files.
- Three different ways to edit the video Three different options to edit the video: 'Music Beat "Constat Time, "User Markers.'
