You can make waves by turning your everyday picture into a saga of epic fish. Follow this comprehensive tutorial on how to recreate my adorable photo entitled "Catch of the Day" from beginning to end.

Learn how to combine images from the stock market with your own photographs, and then adjust the scale, light, and color tone to make a more cohesive photo.

In this instructional video, I'll teach you how to alter tones for the eyes, skin, and cheeks in order to get the perfect shade of sea undertone. Learn about various ways to dodge or burn, and how to apply a detailed/painted style to your photograph. You'll be able to look through all the sources I used for this image to help you create your own unique photograph that is bursting with striking details. Do not worry, gaining these techniques will be easy!

All edits by hand. There are no actions to take. I will edit using Photoshop Creative Cloud.
